The department is equipped with adequate laboratory facilities to meet the challenges in different areas of Computer Science and Engineering.

ABOUT WORKSHOP

Workshop aims to facilitate participants to use the modern tools and techniques for medium-to-large Technical or Scientific book writing. This workshop will provide hands on practical experience on a document preparation system. The main objective of this workshop is to teach the various techniques required in books writing and the method for preparing the report of the research works. Basically in this workshop the rough draft is been taught before making it into a fair draft. A certificate from this workshop earns great credibility in their career certification. The scientific book writing involves a great skill of knowledge and understanding of the particular concepts. This skill is mainly enhanced in this workshop to develop your book writing skill, Whereas the Non technical book writing involves great need of sense and emotional touches so that it attracts people to read your content of writing. Many in this world lack the basic qualities for book Writing and in order to achieve success this workshop is the best place to show case your skills as well as learn new techniques related to it.
